

ANALYSIS REPORT

Doc nr: AR_20BO001_FP

SUMMARY:

This analysis report has been prepared for Folium Biosciences Europe BV.

PROCEDURE:

Identification and quantification of cannabinoids has been performed via HPLC-UV analysis according to internal analytical methods.

Samples are analysed in duplicate. The data is reported when the duplicate analysis showed that:

- the 6 standards used in the sequence have a RSD% <2%
- the main component has a RSD% <5%
- other quantified components have a RSD% <10%

PRODUCT INFORMATION:

Client: Vitaa B.V.	
Sample name: 1 % Pure CBD Body Oil with vanilla-signature fragrance	Sample type: oil
Analysis date: 20 October 2020	Batch Number: 20BO001_FP

CANNABINOID PROFILE RESULTS:

Cannabinoid	Result
CBD	1,02 %
Δ -9THC	n.d.
Δ -8THC	n.d.
THCA	n.d.
CBDA	n.d.
CBG	n.d.
CBGA	n.d.
CBN	n.d.
CBC	n.d.
THCV	n.d.

Note: n.d. = not detected
