

ANALYSIS REPORT

SUMMARY:

This analysis report has been prepared for Folium Biosciences Europe.

PROCEDURE:

Identification and quantification of cannabinoids has been performed via HPLC analysis according to internal analytical methods.

Samples are analysed in duplicate.

The data is reported when the duplicate analysis showed that:

- the 6 standards used in the sequence have a RSD% <2%
- the main component has a RSD% <5%
- other components to be quantified have a RSD% <10%

GENERAL INFORMATION:

Client: Vitaa	
Product name: Pet intake 2.5% CBD	Production date: 10-March-2021
Batch nr Product: 21MO020	Expiry date: 24 months after production
Batch nr used Broad Spectrum CBD oil: CONO19-127	Analysis code: 21MO020_FP

RESULTS:

Analysis date: 11-March-2021

Sample concentration: 2.5%

Cannabinoids profile results:

Cannabinoids	Wt. (%)
CBD	2.54
Δ -9THC	n.d.
Δ -8THC	n.d.
THCA	n.d.
CBDA	n.d.
CBG	0.04
CBGA	n.d.
CBN	n.d.
CBC	n.d.
THCV	n.d.
CBDV	<0.03
Total Active	2.58
