

Folium Biosciences Europe BV

ANALYSIS REPORT

SUMMARY:

This analysis report has been prepared for Folium Biosciences Europe.

PROCEDURE:

Identification and quantification of cannabinoids has been performed via HPLC analysis according to internal analytical methods.

Samples are analysed in duplicate.

The data is reported when the duplicate analysis showed that:

- the 6 standards used in the sequence have a RSD% <2%
- the main component has a RSD% <5%
- other components to be quantified have a RSD% <10%

GENERAL INFORMATION:

Client: Vitaa B.V.	
Product name: 10 % CBD in Hempseed oil/Grapeseed oil	Production date: 11-April-2022
Batch nr Product: 22MO009-10% Hemp. Grape	Expiry date: 24 months after production
Batch nr used Broad Spectrum CBD oil: CONO-20-24	Analysis code: 22MO009_FP

RESULTS:

Analysis date: 12-April-2022

Sample concentration: 10% CBD

Cannabinoids profile results:

Cannabinoids	Wt. (%)
CBD	10,00
Δ -9THC	n.d.
Δ -8THC	n.d.
